DETAILED ACTION

Response to Arguments

In response to the applicant's response of February 20, 2004, the examiner made an error in giving one (1) month to reply to the Office action mailed February 10, 2004. The shortened statutory period should have been three (3) months.

Therefore a new period will be restarted from the date of the mailing of this Office action. Any inconvenience is respectfully regretted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, and 3-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Butler et al. The pipe is readable on elements 2 and 22 and the handle is readable on element 20 or 60. Element 1 is readable on the means for forming the aperture. Figure 2B shows the sealing fluid injection and fluid entry device. The threaded aperture formed in an element 98, which is readable on a part of the fluid entry device.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
